

Wincor Nixdorf® Ships 10,000th Intelligent Deposit Cash/Check Deposit Module (CCDM) ATM

Wincor Nixdorf Dominates Market in Single Input Intelligent Deposit ATMs

AUSTIN, TX – August 4, 2010 – Wincor Nixdorf Inc., one of the world's leading providers of IT solutions and services to retailers and retail banking, today announced it has shipped its 10,000th CCDM ATM in the United States. This milestone illustrates the increasing adoption of ATMs that accept bulk deposits of check, cash or a combination of both through one single input.

Two of the top five U.S. banks, along with other leading financial institutions, have led the adoption of this revolutionary module, first introduced by Wincor Nixdorf, which eliminates the need for deposit slips and envelopes, making transactions simpler for financial institutions and end users alike.

"The shipment of the 10,000th CCDM marks a significant milestone in the adoption of innovative ATM solutions that transform the banking experience," said Patrick Wright, President and CEO of U.S. Operations, Wincor Nixdorf. "This technology is a key component of our ProCash™ ATM family, an innovative and advanced line of solutions proven to deliver a significant competitive advantage for financial institutions."

The module, which was the first of its kind when launched in November 2002, has the unique feature of a single input that accepts both cash and checks in bulk form. Today, nearly ten years later, Wincor Nixdorf continues to be the leading provider of the CCDM module, which has proven to be an extremely attractive feature for banks looking to optimize customers' ATM experiences.

The advantages of Wincor Nixdorf's CCDM technology include reducing costs at financial institutions, such as those arising from the extensive post-processing of night safe deposits. Additionally, financial institutions benefit from greater accessibility and service and the reduction of manual work at the counter, which allows the bank staff to focus more on customers. Wincor Nixdorf estimates banks can save up to \$125,000 per branch* when using deposit automation solutions. Financial institutions interested in adding this functionality can do so seamlessly at anytime.
