

# PRC110 Coin Counter

This product line represents a very cost-effective concept of coin processing. The PRC 110 is mainly used for counting coins or tokens. It can continuously count (CC) and count to a preset number (PC). The machine has a hopper with an automatic coin feed for a single denomination operation. The PRC 110 processes pre-sorted coins. The double-knob-adjustment allows simple setup. One setting of the knob is enough to select the proper denomination out of a maximum of 10 different denominations. Coins which are smaller by at least 0.5 mm than the present set denomination are off-sorted automatically. A memory allows the storage of the counted coins.

## Detection

<b>Diameter</b>	14-34 mm
<b>Thickness</b>	0.8-3.8 mm
<b>Coin denominations</b>	0-9 (10)
<b>Form of counting</b>	CC / PC

## Capacity and Speed

<b>Capacity hopper</b>	4300 pcs.
<b>Counting speed</b>	1800-2400 pcs/min

## Technical Data

<b>Dimensions (W x L x H)</b>	265 x 320 x 375 mm
<b>Weight</b>	11.8 kg
<b>Power consumption</b>	80 W
<b>Power supply</b>	110V/60Hz-240V/50Hz
