

High Speed Coin Sorter System Disc Sorter CS 3515

Ellsworth Systems, LLC

A quick and safe way to count and sort coins.

Disc sorter CS 3515 is a high performance counting and sorting system, which is specifically designed for processing medium and large quantities of coins. CS 3515 can count and sort nine different types of coins. It can also recognize and sort out foreign coins.

- The disc sorter can count, sort and settle mixed coins in one work cycle. Foreign coins and counterfeits are rejected.
- CS 3515 can process up to 2400 coins per minute. Operation is facilitated using a keypad and a clear display for operator guidance. It also indicates the respective account information.
- Customized parameters can be preselected in advance, thus offering a multitude of possible applications for logging of results with detailed storage.
- Adding application is also possible.
- Using the receipt printer you can document the statement of accounts and print information stored.
- Different memory levels make it possible to retrieve individual and total amounts as well as individual denominations and amounts of respective types of coins.
- The Disc sorter enables you to program as many stops as you like for every type of coins, i.e. the typical quantities used by banks for bagging.
- A bagging unit equipped with level monitor guarantees a safe flow of operations.
