CS-3320

coin sorting machine

For years, the **Reis CS-3310** coin counting/sorting/packaging machine has been recognized as the most accurate and durable product on the market.

Now, **REIS Company's** experienced engineers have redesigned the well-known **CS-3310** to better meet the challenges of today and those of the future.

The ever **reliable coin recognition system** has **been improved**. And the choice of new construction materials results in more environmentally friendly components.

The **new ergonomic user interface** allows faster and more simple inputs and better recognition of counting results.

REIS has developed **new quality solutions** for your coin sorting needs.

The **New Selectric CS-3320** offers real value for the money.

CS-3320

Improvements through Redesign

Redesign of the successful CS-3310 coin sorter leads to great improvements in many areas.

- **Higher accuracy through better manufacturing tolerances.**
- **Longer product life through new materials.**
- **Even more reliable coin recognition through digital technology.**
- **Better ergonomics through modern user interface.**
- **Environmental safety through recyclable materials.**
- **Secure**
- **Reliable**
- **Durable**

Specifications

- **Recognition: up to 9 coin values**
 - **Drawers: 9 separate drawers and 1 reject box**
 - **Capacity: Hopper approx. 700 pcs. (10 Cent), drawer approx. 1000 pcs. (10 Cent)**
 - **Sorting speed: up to 600 coins/min.**
 - **Coin Recognition: RCDS 3**
 - **Power supply: 220 - 240 V/50 Hz; 100-120 V, 60 Hz**
 - **Power consumption: approx. 100 W**
 - **Noise level: 72 dB (A)**
 - **Printer: external, optional**
 - **Additional display: external, optional**
- CS 3320**
- **Dimensions (W x H x D): 662 x 470 x 305 mm**
 - **Weight: approx. 31 kg**
