MultiCount™

Count-by-weight cash counter
Count multiple cash drawers in a matter of minutes

The optimization of cash management calls for specialist experience, resources and truly innovative technology. Across the world, Talaris' cash management solutions are trusted by thousands of organizations to ensure their cash is managed securely and efficiently while delivering the ultimate in productivity.

MultiCount provides a fast, easy and accurate way for financial institutions, restaurants and retailers to count notes, coins and other media.

MultiCount uses a count by weight method in conjunction with highly accurate weighing technologies to count notes, coins and other items. It is perfect for restaurants, retail outlets and other businesses. MultiCount ensures accuracy and greater efficiencies, especially during end-of-day drawer or safe balancing. Preparing start funds and audits throughout the day can also be done easily.

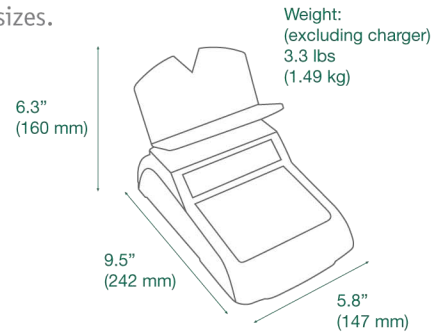

Fast and efficient

The user-friendly keyboard enables users to FlashCount™ a till in less than a minute. Each MultiCount comes with the ergonomic FlexiCup, and can be configured for use with a wide range of till cups.

Enhanced management capabilities
MultiCount was designed to handle loose and packed coins, notes and non-cash items, such as coupons, tokens or gift certificates — making it a versatile and valuable tool for managing a wide range of cash management operations. It can track and store activities for up to 50 cashiers and/or till identifications. Additionally, MultiCount allows users to program up to four separate start fund levels, making it the perfect frontline tool for companies of all sizes.

Compact and reliable

MultiCount plugs into an outlet or can be powered by standard rechargeable AA batteries with 12 hours of operating time. Complete with battery backup, MultiCount ensures data remains intact during power outages. The compact, lightweight design and retractable carrying handle make it a great choice for users requiring portability.
